

## Chase Little

Before I started the AnnieRuth program, I was a bit unsure of what I was wanting to do as a career path. Although while I was in the program, I was able to nail down a career path. This career choice is still pretty broad, but I was able to find a path that interested me. After the Saturday morning seminars had ended, I was rewarded with an internship experience. Since my area of interest was business, I got pair with Whitney Millwood and Aflac.

During the internship with Aflac I was able to learn a lot of important lessons and life skills. These lessons and skills that I learned are things that I can used to benefit my future career. While I was with Aflac I was able to talk to a lot of business owners/leaders in the Jacksonville area. I was also able to help Whitney and her husband Brock set up and invite local business owners to a lunch and learn that was hosted by Aflac at the Jacksonville Chamber. I was also able to attend this event and learn about the opioid crisis in Jacksonville. Another part of the internship that was very exciting was being able to go out into the field with some of the insurance agents to see how they sell insurance.

Lastly the amount of knowledge and advice that I was able to receive during this internship experience and during the AnnieRuth business seminar will definitely help me be able to have a successful career. I am so thankful for the AnnieRuth foundation for partnering me with Mrs. Millwood and Aflac. This is an experience that I will use to the best of my ability to benefit my future career. Once again, a big thanks to the AnnieRuth foundation for making this possible.
